J. ALMSTRONG, Esq. who will be found at their offices daily from 2 to 4 p.m. prepared to give all needful explanations The Committee will sit regularly on Tuesdays and Fridays at the Chambers of Mr. FRANCIS. The force will be on the same footing as are Volunteers in England, that is to say: They

are liable in case of war to be called up for active service and will then be under military command and subject to military law, receiving the same pay as regularly enlisted soldiers, and being entitled to pensions for wounds, &c., &c. They will not be required to serve out of the columny and will be led by their own officers. In peace time, they are at liberty to leave at any time on 14 days notice; will only be under military command when voluntarily exercising or on duty together with the regular troops; will be subject to such regulations as to drill, discipling, and efficiency as His Excellency the Governor may appoint, and will be annually inspected by a regularly deputed Military Officer. The Government will defray all expenses of

commissioned officers.

It is desired to establish one Battery of Artillery and 3 Machine Gun Companies, all the members to be trained also in the use of the rifle or carbine. Pony draft for both field and mechine gune will be provided to and from palce It is suggested that friends and acquaintances

The Hongkong and Shanghai Bank has its capital nominally in silver and its accounts are kept in dollars, but it declares its dividends in sterling, a large proportion of its stock is held in England, it takes gold deposits, and the quotations for Impérieuse for Bangkok and Singapore, its shares are really controlled by the Loudon market; its principal business is exchange andits loan business, profitable as it may be, is a branch which under present circumstances it does not seek to extend. The policy pursued by the Chartered Bank is much the same as that followed by the Hongkong and Shangbai Bank, and being entirely on a gold basis it has if anything to follow out the policy rather more severely. The Bank of China, Japan, and the Straits, from which great 7.50 things were hoped, was unfortunately started with its capital in gold and its head office in 850 London instead of in the Far East, and it 12 50 has consequently been unable adequately to being that the stont little ve sel has just com-18.00 fill the void it was called into existence for. With gold appreciating at its present rate it is an altogether unsuitable medium in which to make advances in silver-using countries. The holders of the yellow metal are afraid to turn it into dollars to be lent out at interest, because they do not know how little the dollar may be worth when the time for repayment comes, while borrowers, on the other hand, cannot afford to contract obligaalsimate discharge may cost them. There has been some talk of the establishment of a branch of one of the Indian banks in Hongkong, and the relief that would thus be afforded to the present stringency would no doubt be very welcome. AFTER THE FROST.

In order to observe the effect of the late cold vave on the insect life of the colony, the undersigned spent the afternoon of the 24th in the Happy Valley and the adjacent country, noting very insect on the wing. The west for was would have been observed. This year, however, insects have been far loss plantiful, many of the common species not having put in an appearance : but even a fortnight ago the benutiful blue-glassed Euplea superba, the green spotted Danais a fair sprinkling of other species, were to be good will have to remain unsatisfied until the close gardens. The warm sunshine, too, had tempted out some of the species of Papilio, or swallow-I tailed butterflies, the chief present of our prospect of remanerative collecting at the end of the month.

All this is now changed. One walk revealed the already suspected fact that nearly the whole I the butterfles on the wing had been killed by the old wave, the very few species we observed being almost without exception, fresh specimens year. He is a Roman datholia, and is married the last few days. Not a single specimen of E. seperba or D. genutia was soon; and of the abundant D. similis; three only, one much and handsome new building now so rapidly nearon the wing before the frost, were now entirely some time. Some, however, remained in the absent, and of the white Pieris canilla only two freshly emerged specimens were noted. The tawny-brown Cupha erum rathis, also conerally pleutiful at this season, showed up as a school is specially intended. The attendance of Solitary worm specimen. Two fine examples of those whose parents remain in the colony has the blue-banded Vanessa charania, quite fresh, been most regular, and their diligence very were basking on the hot stones, as is their wont. and were the only insects we saw worth taking, and anoually examined by the Inspector of and to this proceeding they objected, and are Of the smaller butterflies a little brown Myco-

Wasps, boos, and flos had almost disappeared, and so had ante and grasshoppers, and not a single specimen of the beetle tribe was observed. In the Gardens there did not appear much range from the frost to trees and shrabs, the Hibiscus r masiacusis having suffered most. its leaves being much wilted; while the Abutilons and Poinsettias were also slightly frast-bitton. Of the wild or introduced plants the chief sufferer was the Lantana comera, the blossoms of which are so attractive to insects l all over the tropics, and here not least so; almost every leaf on some of the shrubs was blackened and killed, and hanging to one of the twigs pupil teacher of the same, resigned their

known habit. The most juteresting phenomenon we noticed was the torpidity of the sonsitive plant. Mimosa

pudica, which had begun to put out new leaves. dome of these leaves still look green and healthy, progress, and expansion of the Institution has but were found to have lost most of their irritability. It required vigorous stroking or knocking to make the leaflets close, and the plant could be plucked without the loaf-stalks reflexing. If the branch were then very vigorously shaken the petioles would bend downwards, but the effort seemed to arhaust the plant, and the leaves hing perfectly fliccid, so that if the stem were hold upright the leaves hung straight down, but on turning the plant upside down the leaves fell over. The offect was as if the leaves were hung on cotton threads instead of being attached to stiff petioles The total number of species of butterflies isen was 8, and of individuals under 20. Under ordinary circumstances about 25 species would be their report of the Sermon's Chaplaincy and soon and individuals by the hundred. J. J. WALKER, R.N., F.L.S. &c.

A FRENCH HISTORY OF HONGKON ( . . . )

There is n't present appearing in the columns

At the present time a translation of the following reand Merchant Service sat Alewh to the repast ference to w previous period of commercial depression may be read with some interest :---"Hongkong," wrote the French Consul 1863, "thanks to its groographical situation. of its Tbacquent commercial history. It is an axiom of machanics that every notion: s followed by a reaction of equal force 8 15 is the same in affairs, but in the reactions all the ground is not lost, or progress would be impossible; but every period of setivity is followed by a period of stagnation. Hongkong has proved no exception to the rule. The years 1864 to 1868 - were unfortunate, not to

It must be asknowledged that after the ad vance which we have described, the colony, and, and pounds. moreover, the whole of the European communities in China, were seized with a sort of madness. The American war had made means of bringing 1,268 mon ashore to China and Indla, especially the latter; the church on Sandays, and 2,150 men ashere purveyors of cotton for the world. Banks were established in

xcess of all requirements. In 1862 and 1863 Longkong and Shanghai had five banks; in 1864 they counted eleven, and the competition beonno killing. Thus the years 1865, 1866, and even 1867 were narked by financial disasters, both in Houg-Sydney B. J. Skertchly, F.G.S., gare a New Year kong itself and in China, but always with an adverse effect on the business of Hongkong. ## CORRESPONDENCE.

We do not hold amsetyes responsible for the opinions expressed by our Correspondents. THE HONGKONG REGIMENT. TO THE EDITOR OF THE "DAILY PRESS," Sir. - Every person who has had a chance of spaing the new Hougkong Regiment is ready to agree that they are a fine body of man, but very for have had any chance of seeing them on parade, and their new uniforms have so far only seen the light on one occasion. It is true that a sample specimen may be seen every day doing guard duly at Hendquarter Office, but his comrades are versly in any uniform, being allowed to wander through the city in mufti, and very picturesque objects they usually are in their native garb. I think, however, the Commandant might have a full dress parade of the entire regiment on this skip the water, or they might be mighted through Queen's Road to West Point and back along the Bonham and Caine Rands. This would give the general public an opportunity of seeing their "Own Regiment," and it would at the same time serve as an object lesson to the roughs of Taipingshan. I would also suggest that a sham fight in Wong seicheong Valley in which both Regiments-or even all the forces of the Garrison -might take part would be both good practice for the troops and a welcome entertainment to the colonists. Of course I am well aware that the troops are not here to minister to our amusement, but the colony is entitled -after doubling its military contribution-to at least have a look at its new defenders.-Yours faithfully,

and Mrs. A. A. Baker, Mr. F. G. Collins, Assist. cidents it is recommended that the following. Rules be observed by all Vessels approaching

i.-Vessels intending to pass through the "Feima Channel" should hoist "V" of the International Code (a white flag with a red diagonal cross) at the fore; inward bound vessels to display it on passing the Woosun's Spit Buoy, and ontward bound ones to display it on passing the upper end of Gough Island. 2.—Not more than one vessel at a time should

attempt to pase through the "Feima Channel" or over the shoalest part of the Bar, in the line of the old Bar Marks. 3.-Vessels approaching the bar when the signals show sufficient water for them to cross on the line of the old hir marks, should not use the "Feima Channel" but leave it free for larger vessels.

4.—A very careful look-out should be kept by

all vessels approaching the Bar, and those having the tide against them should wait for those going with the tide to pass first; also a vessel overtaking another should regulate her speed so as to allow the one ahead to get clear of the Bar first. As the hed of the river in the vicinity of the Bur is liable to frequent changes Captains and Pilots wishing to obtain the latest information as to depth of water, etc., should apply either at the Harbour Master's Office, Shanghai, or to the Berthing Officer in charge of the Woosung
